

VERCITY

– Sweden's first galleria
for higher education

EDUCATION AND INNOVATION

- Sweden's first galleria for higher education and creative development
- An oasis [venue] where bold and innovative players can blaze new trails and write new codes.
- A hub where human diversity and innovative solutions meet.
- A place where everyone can realise their educational dreams and their dreams for the future.
- Developed in Nacka City next to the new metro stop - opens 2023

The majority of children in school today will have professions that we currently lack training and education for.

In Vercity we bring together various actors who not only offer education, but also together challenge how education and learning environments should be organised in order for Sweden to continue to be a world leader in knowledge and innovation.

NACKA – URBAN DEVELOPMENT AND TALENT GROWTH

- We know how to grow talent and we have growing businesses, a rich cultural life, great diversity and a passion for breaking new ground.
- We want to strengthen Sweden's position within education and actively help to build and improve the standing of the Stockholm region.
- We want to develop VERCITY for the enrichment of the city of Nacka and its people.
- As Nacka continues with its urban development for a sustainable society, learning and culture will be an essential building block for attractive and vibrant living environments.

VERCITY PILOT

VERCITY pilot – development step by step together with other clever and innovative partners

The VERCITY pilot opens temporary facilities in March 2018 and is a place where future business models for education in interaction between several actors are developed, and learning environments are explored. VERCITY will open in full scale in 2023.
